

ADAMANTES III 25TH

Adamantes has been a revolutionary and always modern design since 25 years ago.

Speaker-shape design was especially realized in order to match astonishing and realistic sound performance with Italian cabinet craftsmanship. This makes each speaker a unique and precious piece-of-art.

Full wood cabinet is engraved standing out multifaceted front and rear baffles in order to provide a circular emission of sound waves around the loudspeaker and to give a close approximation to the theoretical ideal of point-source radiation.

Sound performance is impressive in terms of 3-dimensional feeling: the loudspeaker quite simply 'disappears' from the scene, giving the listener the sensation of a highly realistic 'virtual' soundstage.

Closer to cabinet shape study of the Diapason flagship Astera, the front multifaceted panel of the Adamantes III 25th is provided with different angles compared to previous version Adamantes III, improving drivers emission and allowing more cabinet thickness. As a result of this improvement sound performance is considerably rich of harmonics, more controlled in cabinet resonances and capable to give realistic emotional feeling close to live musical events.

The original Diapason stands are recommended together with Adamantes III 25th and Karis NW, since they contribute to the superb sound and aesthetical value.

The 63 cm. 3/P stand patented design removes cabinet vibrations by transferring them away from the speaker to the floor through three steel support bars. The wooden 3 columns shape works just as external structure since the speaker is isolated from the ground by steel bars only.

The 75 cm. 2/B stand is made of a heavy metal and wood structure. The 2/B is provided with 4 cm spikes under the bottom base, making the stand ideal for use on carpet floor.

SPECIFICATIONS

Frequency response: 40/20.000 Hz

Bass driver: Ø 170 mm polymethylpentene Diapason Direct Drive

Tweeter: Ø 20 mm treated silk soft dome

Efficiency: 91 dB/1W/1m

Freq. crossover: 4.600 Hz

Nominal impedance: 6 Ohm

Min impedance: 3,4 Ohm/200 Hz

Type: rear-ported reflex speaker

Finish: Canaletto walnut solid wood Water natural paint finishing

Weight per speaker: 8,5 Kg

Dimensions speaker : 240x360x365 mm

Optional: cloth cover grille
